Grain

Random match

Wood planks or veneer sheets are joined at random, of which expressive surface patterns require craftspeople for high skills and an eye for beauty.

Book match

Two pieces of wood planks or veneer sheets with similar surface patterns are arranged side by side to look like a book opened, which makes surface patterns look more dynamic by grains running symmetrically.

20 25 30 35 40 45 50 The figures in the boxes represent sales periods more than 20 years.

- The seat fabric and leather price is classified in seven grades.
- Delivery and installation are separately charged.

Cork

An eco-friendly material, approximately half of which is produced in Portugal. Cork is made from the tree bark of cork oak. It is a recyclable and waste-free natural material that can be obtained without cutting trees down because it's made from residue from producing wine stoppers, etc.

This ellipsoid furniture made of Japanese birch consists of 22 arc-shape parts for size 80; 24 for size 100. The curve and grid of each piece are molded and cut by machine; polished and oil-coated by hand due to its complex shape. The combination of advanced technology and human skills results in this beautiful product. It's something that you not only use but also enjoy by looking at.
