Grain

Random match

Wood planks or veneer sheets are joined at random, of which expressive surface patterns require craftspeople for high skills and an eye for beauty.

Book match

Two pieces of wood planks or veneer sheets with similar surface patterns are arranged side by side to look like a book opened, which makes surface patterns look more dynamic by grains running symmetrically.

TACK

Noboru Nakamura, a designer based in Hokkaido created this personal chair in 1978, and it was reborn through brushing up the detail of the design. Tack means “Thank you” in Swedish. This is the real Hokkaido chair: designed by a Hokkaido designer; made of Hokkaido ash; of which thick leather is supplied by a Hokkaido saddle maker. The structure is resistant to aging because the joints of the frame are designed to be tightened by the weight.

Special thick leather

The special leather is 4 mm in thickness, tannin-tanned, aniline-dyed, and available in the following two colors. You can enjoy the leather changing, stretching, and fitting to the body with age.

The belt at the back of the seat works as a tension adjuster. The frame and upholstery structure is to be disassembled for future re-upholstery.
